

Virtual Activities

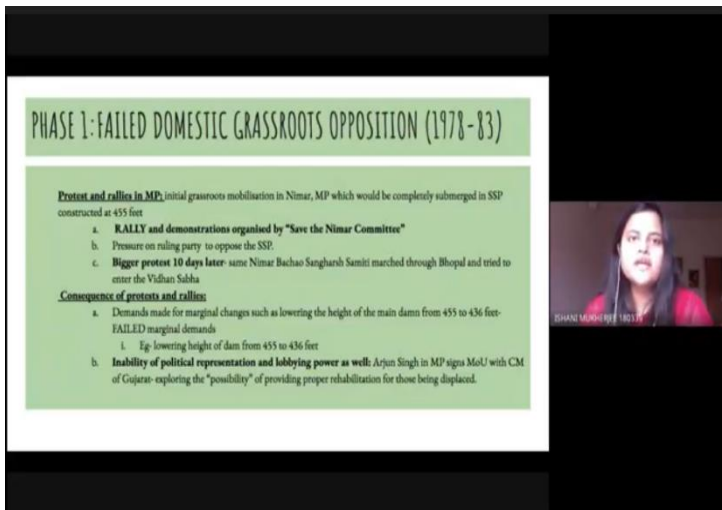

As the world grapples with the ongoing devastation brought by Covid 19, reinforcing our belief in the precarity of human life in the wake of mutating variants along with other natural disasters, our existence is thrown into disarray at an accelerating rate. This has significantly altered everything that we had taken for granted and requires a paradigmatic shift in approach as to how we address our everyday life, calling for a lot of introspection and reflection. At the same time, the fighting spirit, resilience and hope for triumphing over these extraordinary times despite the all-pervasive bleakness, also continue to contour our thought process. To institute a semblance of normalcy and celebrate the survival spirit of humanity, JMC has organized a plethora of virtual events since the pandemic has set in. Covering a vast spectrum of topics, these have kept the students engaged in interactive sessions and continued to give them food for thought along with meeting their curricular requirements. While regular online lectures tried to create a sense of virtual classroom experience, extra-curricular activities have attempted to make the online learning environ more intellectually stimulating.

❖ **Online Classes**

The transition into the online mode has necessitated a re-orienting in pedagogical methodology to keep the curriculum delivery effective and efficient. All efforts have been made to ensure that the erstwhile interactive classroom experience is replicated in the virtual mode and knowledge is imparted with the same level of rigour and enthusiasm.

An online class in progress

Snippets from student presentations during online classes

❖ Webinars

To keep the students academically motivated and emotionally resilient, a series of talks and workshops have been organized where eminent speakers from different schools of thought have been invited to share their expertise with our students. This has not only opened up a very productive platform for students to awaken towards different schools of thought but has also made them more appreciative of the variegated perspectives one could adopt to adjust to the new normal and re-assess their relationship with the screen.

❖ Department and Society Events

Covid 19 has brought on a very unique situation where both academics and leisure have been reduced to the screen. In an attempt to institute the academic calendar digitally, different departments and student societies have conceptualized and implemented extra-curricular events in novel and exciting formats so as to provide a space for experiencing a sense of togetherness and development of interpersonal bonds among students and teachers.

Some glimpses from the various events....
