QUESTIONS WORTH PONDERING OVER BUDGET
by Jennifer John

As the new budget is set to come on February 1, many questions will be springing up in all our heads. What kind of a budget is it going to be this time, will it be an expenditure oriented budget as last year, what is the government planning to do against the years of longstanding fiscal problems? The problem of off-budget expenditure has plagued us for 4 years. It is common knowledge that well-chosen and well-executed investment projects, especially in the infrastructure sector, can improve the economy and ultimately pay off with faster economic growth. Will the government use the current crisis to make bold decisions about expenditure and property ownership? Unlike in other cases, it is not necessary to stage public finance decisions in a crisis situation. Last year's expenses do not correspond to the indicator of the crisis period. The government should pay more attention to capital investment to stimulate economic growth. They may need to change their asset ownership profile by shifting most of their operating assets to the private sector and focusing on entirely new initiatives. The crisis brings major changes in income and expenditure. In such a crisis situation, impatience and uncertainty can lead to unnecessary decisions. Although the government has made a reasonable decision, it is still too early to adjust it to this year. For example, some sectors have lower spending than what was forecasted and we do not know how that came about.

Will the government repeat the same mistakes over and over again? Or will they for once and final take a brave decision and fix all the mistakes of the past?

REVENUE MODEL

We conducted a survey to analyse the consumer preferences in buying shampoo products and after taking inferences from it, we are expected to set the selling price of the product in the range of ₹ 3 - 8 per tablet.

- 25.7%
- 11.6%
- 16.6%
- 15.1%
- 15.1%
- 15.1%

The avg. market price of Shampoo Making Machine in India is Rs 5 Lakh/ Unit.

Some donations/funding has to be given to these NGOs so that they can pay their workers who would be involved in the production of the shampoo tablets.

We can keep a margin of 10-15% of the selling price for NGOs.
