ADMISSION CRITERIA 2021-2022

In the following para's we define the overall admission criteria and the admission criteria for each of the departments

Procedure for calculation of 'Best Four' subjects percentage for Honours Courses

English is Compulsory for the calculation of Best Four Subjects marks. Other three subjects may be chosen from the list given below. Please note a maximum of one elective language subject from those mentioned below may be included in addition to English for the calculation of Best Four subject marks:

List I

- i.Accountancy
- ii.Accounts
- iii.Anthropology
- iv.Biology
- v.Biotechnology
- vi.Botany
- vii.Business Maths
- viii.Business Studies
- ix.Chemistry
- x.Civics
- xi.Commerce
- xii.Computer Applications
- xiii.Computer Science
- xiv.Economics
- xv.Elective English
- xvi.English
- xvii.English Core
- xviii.Functional English
- xix.Geography
- xx.Geology
- xxi.Hindi
- xxii.History
- xxiii.Informatics Practices
- xxiv.Legal Studies
- xxv.Mathematics
- xxvi.Philosophy/Logic and Philosophy
- xxvii.Physics
- xxviii.Political Science
- xxix.Psychology

xxx.Sociology
 xxxi.Statistics
 xxxii.Zoology

All subjects to be included in the calculation of 'Best Four' must have at least 70% theory component of exam. In case, the subject to be considered does not have 70% theory component and 30% practical component, then the marks of theory and practical only shall be converted to 70% and 30%, respectively on pro rata basis. These new marks will then be considered for calculation of 'Best Four'

If a candidate has scored: Physics 90 (theory 50, practical 40; max. marks theory 60, practical 40), and Chemistry 91(theory 52, practical 39; max. marks theory 60, practical 40) which is not in ratio of 70: 30, then the marks can be converted on pro rata basis

Pro rata marks in physics = $88.3 \left(\left(\frac{50}{60} \right) \times 70 + \left(\frac{40}{40} \right) \times 30 \right) = 58.33 + 30 = 88.33$

Pro rata marks in chemistry = $89.92 \left(\left(\frac{52}{60} \right) \times 70 + \left(\frac{39}{40} \right) \times 30 \right) = 60.67 + 29.25 = 89.92$
