17. Details and activities of Incubation Centre/Entrepreneurial Support Systems formed by the department

This year our department played a pivotal role in further strengthening the connection between the current students with the alumni through organising seminars on how to do research in the corporate and academic world etc. Chanakya, the strategic cell of the economics department has organised various sessions on enhancing entrepreneurship skills among students by inviting young entrepreneurs to guide them. Our faculty members use extensive social media and professional networks to disseminate information on a continuous basis on job and internship opportunities to the current and the alumni of the department.

18. SWOC Analysis

The biggest strength of the Department is the provision of interdisciplinary opportunities to students from different streams and diverse interests through the cells of the department. The Research Cell (Ecognition) provides students with field experience and opportunities to publish in renowned journals and books. The department encourages students to collaborate with faculty and alumnae for research. The students of the Department have interned with faculty members on government sponsored projects. Our dynamic faculty have ensured that the students have exposure to a myriad of curricular, co-curricular (including research) and extra-curricular events. They have been actively engaged in keeping their skills up to date by attending regular faculty development programs. While the junior faculty members are leading in research and other administrative, research and teaching activities inside and outside the college, the senior faculty Members in the department have been involved in various administrative activities of the college as well. For example, Ms. Smita Gupta - Staff council secretary, Ms. Shalini Srivastava- TIC & Convenor of the Website Committee, Ms. Rajni Singh- TIC in the later half of the year, Co-Convenor of PTSA & Dr. Daisy Sales- Bursar and Acting Principal of the college for sometime of the year. We also have a strong link between the Department and alumni exists: engaging with current students by delivering talks and providing details of job and internship opportunities. Weakness: We can have more number of publications in Q1 and Q2 Scopus indexed journals. We experience constraints in availability of computer labs and latest econometrics software. Opportunities: the online paradigm has made it easier to get academicians from across the globe to engage with students through webinars. This provides greater opportunity for students under the multidisciplinary paradigm for intersectional learning. Challenges: We face difficulty in balancing time between co-curricular activities and extracurricular activities, with overlapping semesters. Databases and statistical softwares can be made available to offer papers specified under the UGCF framework and for research as well.

19. Future Plans

The Department plans to conduct a National/International Conference in 2025-26. We aim to increase Faculty Research Publications in highly cited Scopus indexed Journals and books, and undertake more funded research projects. We aim more of Faculty-Student research collaborations for publication in indexed journals. The Department aims to increase its social and community outreach by forming long term relationship with a social organisation (Blind school, Orphanage and Care home for terminally ill people). We aim for more MOUs with companies, research institutions and government organisations, to place students with better internship opportunities.
