

DEPARTMENT OF MATHEMATICS

INTERNAL AUDIT REPORT

2020-21

Observations and Suggestions:

1. Mathematics, being a practical subject the department can incorporate experiential learning through project work etc to enrich the teaching learning process.
2. Student Progression data should be collected for maximum number of students.
3. Good to note that a few students are qualifying national and international level examinations for admissions to foreign universities/institutions.
4. The Department has organised number of Alumni Talks, which reinforces the bond between the ex-students and their alma-mater. The department may strive to organise more Workshops/Seminars/Conferences (National/International).
5. Student's participation in co-curricular, extra-curricular and community outreach activities within and outside the College is commendable. Number of students have been awarded honors/merit certificate/recognition from college and university as well as other eminent institutions
6. The number of publications by faculty in Scopus indexed journals, UGC journals and peer-reviewed journals have been relatively low and need to be geared up.
