- Method of computing per day usage of library : **Library Register**
- Number of users using library through e-access: **3411 registered users of INFLIBNET.**  
**We assume 15%\* daily usage ( i.e. 512 daily users).**
- Number of physical users accessing library : **388\*\* per day**

Formula:

$$\frac{\text{Number of teachers and students using library per day}}{\text{Total number of teachers and students}} \times 100 = \frac{388+512}{3411} \times 100$$
$$= 26.38 \%$$

\*Due to online classes, we expect this number to be higher.

\*\*388 has been calculated as the average of student footfall using five random library days and assuming usage of library by 60 teachers on a daily basis.

## Calculation for 388 library physical users per day:

(Sum of number of students using library on five random days)/5 + Assumed daily usage by teachers

$$= (380 + 327 + 328 + 338 + 268)/5 + 60 = 388.2$$
