#### FINANCIAL MANAGEMENT

### Jesus & Mary College (University Of Delhi) Announce Certificate Programs

The programme gave students a platform to understand the choice of Investment and alternatives / factors affecting asset allocation. Basics and working of general and life insurance, Mutual funds, real estate markets with factors affecting risk and return, concept of estate planning were taught. It also gave them insights into working of Financial Markets, Evaluation Concept, Risk and return related to various asset classes, Value equity and bonds, Mutual Funds and Portfolio Management – The fundamentals of all these concepts were taught and explained keeping in mind the contemporary market and changes ahead. The program also centered on bettering crucial skills of individual's personality, professional communication and Emotional intelligence; that helped the students become corporate and life ready. Each of these skills is instrumental in preparing the overall development and outlook of students.

After understanding these concepts, the students can apply for jobs at Banks NBFCs' and Financial Institutions. Individuals can also do freelancing provided they have thoroughly practiced the concepts taught.

Participants were evaluated through quizzes, participation in discussions, presentations and project work. Student were also taken through a battery of tests and other tools in order to access these skills individually. Development areas that were limiting the potential of a student were identified and each area was worked upon for overall awareness. Students were given assignments and projects concerned with Self-analysis and Development, Communication Effectiveness and Emotional Intelligence.

All students successfully completed the course for the year.

-

#### CORPORATE COMMUNUICATION AND PUBLIC RELATIONS

This program was offered to students of all disciplines. Industry professionals were in charge of delivering the sessions using interesting case studies and newspapers/magazines were utilized as books to understand the diversity of communications space.

Films and documentaries were screened; visits were made to media houses and All India Radio to engage the students with professionals from diverse media backgrounds. Students benefited from several classroom exercises; they were able to make effective presentations and contribute to group discussions. The challenge and essence of writing was grasped through drafted mock press releases, background notes and introductions.

Some students opted for communications-oriented jobs and those keen on pursuing Post Graduate programs found these sessions and exercises very useful in their tasks ahead.

Assessments are done through viva-voce, quizzes and presentation. All students successfully completed the course for the given year.

<ul> <li>procession and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an entry level understanding of the subject</li> <li>Module 1: Basics of Statistics &amp; Exploratory Data Analysis</li> <li>Module 2: Basics of Statistics &amp; Exploratory Data Analysis</li> <li>Concepts such as Data Distribution, Type of Graphs, Standard Deviation and Variance, Introduction to Sampling, Probability Distribution, Hypothesis Testing, Massing Value Treatment, Feature Engineering, Univariate and Bivariate Analysis</li> <li>Module 2: Introduction to 8</li> <li>Programming principles, Fundamentals of R, Data types and visualisation</li> <li>Module 2: Concept Statistics &amp; Exploratory Data Analysis, Model Building, Model Analysis and Industry Based Case Studies</li> <li>Module 2: Optime Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies</li> <li>Module 3: Time Series</li> <li>Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothering, ARIMA)</li> <li>Module 4: Logistic Trees Regression Analysis, Apriori Algorithm, Industry Based Case Studies</li> <li>Module 4: Cassification</li> <li>Mplying Decission Trees, Random Forest</li> <li>Module 4: Cassification</li> <li>Mitter 4: Assessment</li> </ul> Metamona Analytics (Advanced Level) Programme 3: Aprication-based instruction by industry prosisonals. Designed to give working. Involved of or Data Sciences and diction making for business decisions and how they inter-relate, the course comprises of module, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis	Course Ove	rview (Basic Programme) 30 Hours	
Concepts such as Data Distribution, Type of Graphs, Standard Deviation and Variance, Introduction to Samphing, Probability Distribution, Hypothesis Testing, Missing Value Treatment, Feature Engineering, Univariate and Bivariate Analysis Module 2: Introduction to R Programming principles, Fundamentals of R, Data types and visualisation Module 3: Linear Regression Analysis Module 4: Logistic Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies Module 5: Logistic Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies Module 5: Time Series Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothening, ARIMA) Module 6: Clustering Performing Hierarchical Clustering, K-means Clustering, Scaling Module 7: Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 7: Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 7: Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 7: Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Applying Decision Trees, Random Forest Module 8: Consorte Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Irogram) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course: Module 1: Introduction to Python	The Busine professiona business de and worksl	ss Analytics course programme comprises application-based instruction by industry ls. Designed to give working knowledge of Data Sciences and decision making for cisions and how they inter-relate, the course comprises of modules, research projects	
<ul> <li>Programming principles, Fundamentals of R, Data types and visualisation</li> <li>Module 3: Linear Regression Analysis Applying Linear Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies</li> <li>Module 4: Logistic Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies</li> <li>Module 5: Time Series Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothening, ARIMA)</li> <li>Module 6: Clustering Performing Hierarchical Clustering, K-means Clustering, Scaling Module 8: Classification Applying Decision Trees, Random Forest</li> <li>Module 9: Corporate Lecture Corporate Lecture + Assessment</li> <li>Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Level) Programme 30 Hours Professionals. Designed to give working knowledge of Data Sciences and decision making for professionals. Designed to give working knowledge of Data Sciences and decision making for professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course</li> <li>Module 1: Introduction to Python</li> </ul>	Con	cepts such as Data Distribution, Type of Graphs, Standard Deviation and Variance, oduction to Sampling, Probability Distribution, Hypothesis Testing, Missing Value	
Applying Linear Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies Module 4: Logistic Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies Module 5: Time Series Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothening, ARIMA) Module 6: Clustering Performing Hierarchical Clustering, K-means Clustering, Scaling Module 7: Market Basket Analysis Applying Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 8: Classification Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course			
Applying Logistic Regression Analysis, Model Building, Model Analysis and Industry Based Case Studies Module 5: Time Series Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothening, ARIMA) Module 6: Clustering Performing Hierarchical Clustering, K-means Clustering, Scaling Module 7: Market Basket Analysis Applying Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 8: Classification Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course	Ap	olying Linear Regression Analysis, Model Building, Model Analysis and Industry	
Different components of Time Series, Forecasting Techniques and Model Validation, Stationarity (Exponential Smoothening, ARIMA) Module 6: Clustering Performing Hierarchical Clustering, K-means Clustering, Scaling Module 7: Market Basket Analysis Applying Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 8: Classification Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course	Ap	olying Logistic Regression Analysis, Model Building, Model Analysis and Industry	
Performing Hierarchical Clustering, K-means Clustering, Scaling Module 7: Market Basket Analysis Applying Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 8: Classification Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course	Dif	erent components of Time Series, Forecasting Techniques and Model Validation,	
Applying Market Basket Analysis, Apriori Algorithm, Industry Based Case Study Module 8: Classification Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business Acalytics in and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course Module 1: Introduction to Python			
Applying Decision Trees, Random Forest Module 9: Corporate Lecture Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. Designed to give working knowledge of Data Sciences and decision making for business decisions and how they inter-relate, the course comprises of modules, research projects and workshops. This programme is specifically designed for an higher level understanding of the subject and can be done after a basic level business analysis course Module 1: Introduction to Python			
Corporate Lecture + Assessment Business Analytics (Advanced Level) Programme 30 Hours Course Overview (Advanced Programme) The Business Analytics course programme comprises application-based instruction by industry professionals. #### LIFE SKILL TRAINING CERTIFICATE COURSE REPORT

The IQAC (Internal Quality Assurance Cell) of JMC launched a 30-hour Certificate Course in Life Skills Training which covered the following topics:

1. Financial Literacy

2. Self Defence

3. Communication Skills

4. Health and Physical Fitness

5. Emotional Well-being

6. Building Disaster Management Skills

This is a value-added course which has equipped the students to deal with difficult situations in life at a personal and emotional level. It will also be valued by companies while hiring.

The classes were held in the afternoon or during activities/ mass/CC periods.

The course commenced on 19th August 2019. The session started with an introduction by Dr. Alka Marwaha, IQAC Coordinator. She welcomed the students to the course.

Mr. Apoorvalochan, Head, Cerebral Solutions and Regional Co-ordinator for school mediation, started the course with his lecture on Happiness, Stress Management and Value Education.

The Communication Core Skills Workshop was conducted for a brief period by Miss Samta Marwaha, former Guest Lecturer, JMC and MBA graduate. Additionally, she also holds two postgraduate degrees, including one in Human Resource Management from the University of Westminster, London and is currently enrolled as a postgraduate researcher in the PhD U.K. University, Cardiff at Studies programme Business As a part of the workshop's development, Miss Samta transferred her academic and professional experience in communication into the structure of the curriculum. She commenced the learning experience by outlining basic interpersonal communication skills that can facilitate students in their everyday activities. Some taught core skills reflected practical issues concerning interviews, group discussions, report writing and presentation construction and delivery. On the theoretical front, students were also taught about relevant communication constructs and models. Alongside the teaching of verbal skills, equal importance was given to the more abstract forms of communication such as reflective listening, impact of culture, self perception, filtering and non-verbal communication.

In November/ December 2019, the classes could not be held because of End-Semester Exams. The course was in progress in January, February 2020 but had to be abruptly discontinued in the month of March, 2020 due to the Pandemic.

(Dr. ALKA MARWAHA)
